What advice do I have for my instructor about the use of instructional time (face-to-face and/or online)?

- Try to focus more on more complex topics and go faster through the definitions
- I think the tests given might be more beneficial if they could be taken online, as during testing periods in class, a lot of the time prior to the exam was spent situating students in their seats, and overall just figuring out how to hand out the exam in person.
- The lack of preparation and distribution of content on the presentations was often confusing
- Maybe more study guides
- Nothing. I believe she's doing a great job and she's really nice. ,
- No complaints, had adjustable and optimal office hours
- Be more thorough it was really hard to understand somethings
- don't talk into the mic because it makes it harder to understand you. ,
- I think you did great
- She did well with it. I don't know what advice to give.
